

Life Cycle Contract

Free up your resources
without sacrificing quality

The Life Cycle Contract provides you with FOERSTER test or measurement equipment for a set contract period at a fixed monthly rate, services included. Working closely with you, we define and put together the individual elements that will serve your needs best. Our complete offer includes everything from a test/measurement instrument up to a complete NDT inspection line, plus all the corresponding services, made available for the time frame that works best for you.

Service description

With the Life Cycle Contract you can immediately use the latest FOERSTER testing and measuring technology to its full extent – with no upfront investment. We offer you tailored solutions for your production process: from individually configured test/measurement

systems and/or complete NDT inspection lines, to commissioning, calibration and regular preventive maintenance, through to the training of your employees.

A fixed monthly rate over the entire contract period provides planning security for your costs and frees up your capital.

The benefits

- No upfront investment necessary
- Fixed monthly rate
- No changes in commercial terms over the entire contract period
- Includes test/measuring system(s) and/or NDT inspection line(s), commissioning, maintenance, calibration and training
- Additional, individual 'Business Solutions' modules available to expand the contract scope

We provide you with the latest test/measurement systems or NDT inspection lines; you focus on your core business.

The entire product life cycle under one umbrella:

It starts with planning, custom-fit configuration, installation and commissioning of your equipment. Then, we offer hands-on user and service training for your employees. We carry out regular inspections. Furthermore, we take over calibration management for you – in its entirety. Our remote service will take care of your inquiries quickly, professional and in many cases will solve them without an on-site visit.

You benefit from the modularity and a solution that's been customized exactly to your requirements. We bring our 70+ years of experience when we come to support you!
