

Our service packages

for your individual requirements

We've matched our service offering to your needs. To this end, our three packages for servicing your test and measurement systems are designed to meet your specific requirements. Because the optimum service package covers exactly the services you demand – no more and no less.

With the **Basic Package**, you get fast support from our specialists when you need a repair, as well as a loaner unit (if necessary) to bridge the gap until the repair is complete. This keeps downtime to a bare minimum.

Our **Advanced Package** includes all that plus annual calibration by our specialists. Regular adjustment of your test and measurement systems ensures consistent test quality and provides a way to prove it to your customers. This package even covers the technicians' travel – no extra charges here.

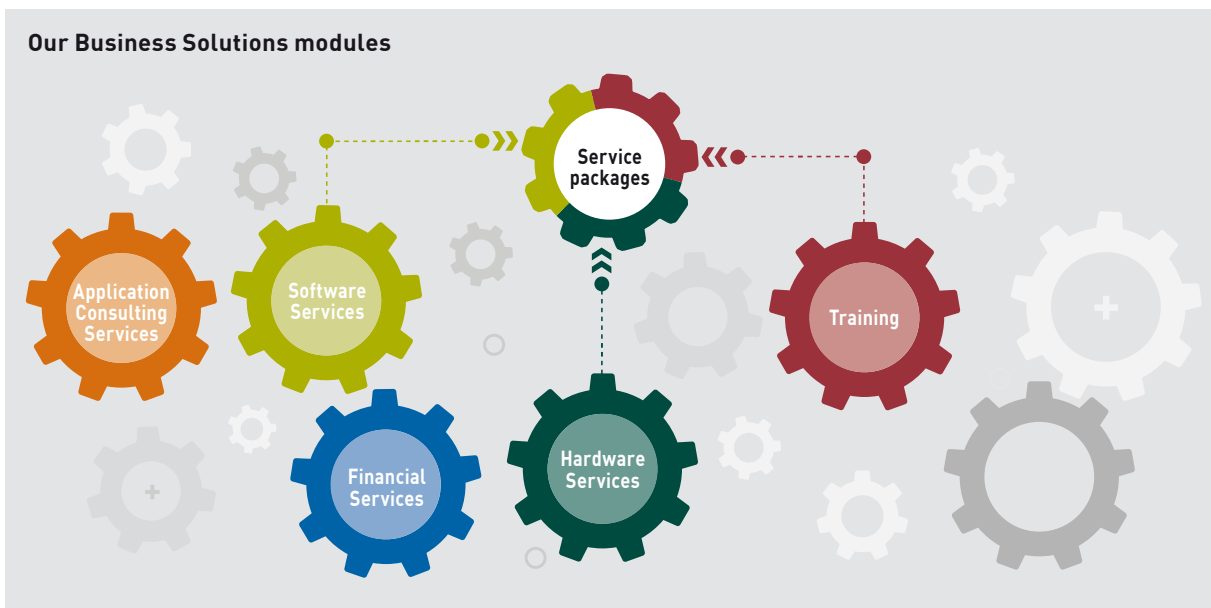

Our **Premium Package** takes service to yet another level. Beyond the offerings of the Advanced Package, it also covers the cost of routine maintenance and repairs* and includes an employee training during the contract period.

Benefits

- Lean processes
- Minimized downtimes
- Defined scope of services
- Fixed contract period
- Consistently high test quality
- QM audit support
- Focus on your core business
